

CLINTON PARKWAY ANIMAL HOSPITAL

Gary Olson, D.V.M., P.A.

Tom Liebl, D.V.M.

Diplomate, American Board of Veterinary Practitioners

Anesthesia/Surgery Authorization

Most of us are concerned about the safety of anesthesia and the surgery that is performed on our pets. Your doctor will do a thorough examination on your pet prior to anesthesia today. In addition to the physical exam, we would like to screen for internal problems that we cannot detect on the physical exam. We advise a general health screen of internal organ function by drawing a small amount of blood and urine from your pet. The doctor will review these lab results prior to anesthesia.

Save an additional \$15 by bringing your pet in early for the "Golden Health Screen". Total cost with savings is \$79.

- Perform the health screen.
- Do not perform the health screen.

How old is your pet in human years?

Adult		Golden		Senior	
6 yr.	→	40 yr.	11 yr.	→	60 yr.
7 yr.	→	44 yr.	12 yr.	→	64 yr.
8 yr.	→	48 yr.	13 yr.	→	68 yr.
9 yr.	→	52 yr.	14 yr.	→	72 yr.
10 yr.	→	56 yr.	15 yr.	→	76 yr.

You can also have your pet permanently identified with the HomeAgain® Microchip. This chip has a code that will be unique to your pet. The cost of the procedure is \$42.50. There is also a one-time registration fee (\$12.50) with the American Kennel Club so your pet will be registered in the national recovery database.

- Please protect my pet with the HomeAgain® Microchip.
- Do not microchip my pet.

I authorize Clinton Parkway Animal Hospital and its staff to perform the anesthesia.

- Call _____ at _____ when the procedure is completed.
- I will not be available by phone.
